Modular Stone Pavement Props

Product URL https://poserworld.com/modular-stone-pavement-props

Short Description: The module stone pavement props are not your ordinary stone pavement, each stone is a separate polygon so that the textures are more randomized and will give a more realistic look. There are 3 modular sections. We have a sidewalk with curbing/edging, a square stone pavement section with offsets and a square stone pavement section with no offsets. Includes three textures with bump maps and for those that like normal maps we have included those as well.
