props. SuperStore Grocery Stock (Prop Set for Poser) All the inventory for your supermarket or convenience store fully textures and poly smooth mesh (morph-able) and scale well. These are not just textured cubed and cylinders, however you are able to stack and bundle and using Poser's grouping and poly reduction features it's efficient to load thousands of these items in your own custom store scene. Includes: 11 varieties of Cased Beet "BeerBox" items. 26 varieties of Bread loaves 20 varieties of Cereal products, 1 multipack 10 varieties of Cheese products 6 varieties of Snack Crisps 6 varieties of Dog Food 12 varieties of crated Fruit 33 varieties of Meat products 9 varieties of Pasta products 20 varieties of Pizza 5 varieties of Tea boxes 4 varieties of Wine bottles, 1 multipack "GroceryStock Set" figure include 968 parented props PoserWorld "SuperStore ShoppingPlaza" Runtime Install, Orientation & Demo

Render <https://youtu.be/5uytIP5tBbI> SuperStore Specific Instructions: The included product software file contents and default extraction and recommended Poser runtime path are listed in the text file "PoserWorld_SuperStoreShoppingPlaza_FileList.txt". Extract the downloaded product .zip file retaining the default runtime folder structure which follows these listed folders: Put the obj files into Runtime\Geometries\PoserWorld\SuperStore Shopping Plaza Put the cm2/ png (camera files) into Runtime\Libraries\camera\PoserWorld\SuperStore Shopping Plaza Put the cr2/ png (figure files) into Runtime\Libraries\Character\PoserWorld\SuperStore Shopping Plaza Put the lt2/ (light set files) into Runtime\Libraries\Lights\PoserWorld\SuperStore Shopping Plaza Put the pz2/ png (pose files) into Runtime\Libraries\Pose\PoserWorld\SuperStore Shopping Plaza Put the pp2/ png (prop files) into Runtime\Libraries\Props\PoserWorld\SuperStore Shopping Plaza Put the jpg files (textures) into the specified folder beneath Runtime\Textures\[PoserWorld\SuperStore Shopping Plaza Load & Use: 1) Start Poser. 2) Set display mode to Wireframe (recommended when loading SuperStore, GroceryShelfStock, and Landscape Figure Sets combined) 2) Go to the PoserWorld\SuperStore Shopping Plaza in the runtimes Library\Props folder 3) Add the desired prop element to your scene. 4) Optional: Add your favorite characters and pose them to suit the needs of your scene. **IMPORTANT Use and Loading Tips:** SuperStore Shopping Plaza figures are large multi-prop scene sets, it is recommended to SET DISPLAY TO WIREFRAME before loading multiple figures. Also, either delete, make invisible or expand the poser ground prop. Scale Poser ground skydome by 400% to encompass the entire scene. A 16GB windows system will be able to load all 8 modules, several clothed Poser figures and render in superfly, however for best performance it is recommended to stage the scene in wireframe (or ant non texture shader display mode) and disable any lights and sets out of camera view especially when rendering in FireFly with indirect lighting enabled. Figures include lighted fixtures, however you may want to add extra ambient infinite light as needed to set the mood, or adjust gamma to bring out occluded detail. There is an indoor light set with extra ambient included to make this easy. Camera with "yonder" parameter set to 1,200 will shoot the length of the parking lot. With optional Shelf Stock & LandScape packs installed, the SuperStore product set includes a pre-built, fully stocked and landscaped store in the root prop directories and scene building and design elements in the subdirectories. The SuperStore scene included is entirely built from the various included prop elements. The set is thoroughly Firefly and Superfly optimized, and many material elements have independently optimized root nodes for each material. All objects are exportable and UV mapped with even spaced quad topology. . Alternate texture maps for most procedural shaders can be found

in the products texture directory. When rendering Firefly consider enabling Indirect Lighting (IDL) within the manual render settings to take advantage of the included ambient lighting effects in light fixture bulb materials. The optional SuperStore Office Security pack includes two props that are easily morphable. The Security Office Chair, Security Office Desk each include several morph dials from the Prop Master Control parameter panel that enables the scene designer to create a very wide variety of chair and desk designs.
