This product uses image maps for textures.

The Discovery of an advanced transforming Alien Fighter crash on earth led us to the creation of the Warthog and Wildhog Variable Fighters. Now introducing the Solinoid Mogwai (Codenamed Gremlin by UN Forces), the fighter that gave us the leg up on transformation technology. Arriving in force in Terran Space, the Solinoid Invaders have launched an invasion from their home system of Solinides in the Solinides Star-cluster. The Mogwai-Esu is a special fighter used by the commanders of the Solinoid invasion force... faster, more manoeuvrable and with heavier armaments The Mogwai-Esu is piloted by only the very best Solinoid Pilots! Here are some of the highlights
Over 75 Points of Articulation on the main figure!

Moving Flaps, Ailerons, Rudders, Opening Landing Gear Doors, Raising and Lowering Gear, turning wheels, Opening Canopies, Deployable slats, fully independently controllable missiles, and much more...

Separate Conforming Figure Weapons and Ordinance, with fully controllable ordinance deployment. (Some sold as separate packs)

Numerous Independent ERC controls on the main figure for complete control of most vital functions from 1 location.

Independent ERC controls for each flap, rudder, aileron, wing, and canopy.

Articulated Landing gear with co-ordinated ERC for 1 dial raise and lower.

ERC weapons controls for launching and steer-able missiles and ordinance.

ERC dials for easy transformation!

Pre-Posed Poses for Fighter configuration and Mecha Configuration.* Note: All of this product's content was created by "theschell" (Christopher D. Schell) with additional help with ERC controls, Poser MAT Files & Additional Texturing by Mark A. Fares (KageRyu). My thanks to Mark for his extra hard work on this figure!
