Movie Camera and Tripod Model with Movements - Poser and DAZ Studio Format

Product URL <https://poserworld.com/movie-camera-and-tripod-model-with-movements-poser-and-daz-studio-format>

Short Description: The 3D professional movie camera and tripod model with movements for Poser and DAZ studio, has a turn and tilt movement. The LCD external screen can be textured with any image you wish. Everything is parented to TriBase (tripod base). To rotate the camera select TripodTB and use the movement that is labeled. To tilt the camera, select Camera Poser and use the labeled movement. You can add an image to the external display by editing the "LensFrameScreen" texture.
