Large City Street and Buildings Scene Poser Format

Product URL <https://poserworld.com/3d-large-city-street-and-buildings-scene>

Short Description: The 3D Large city street and buildings scene for Poser & DAZ Studio is large and well detailed. All items are parented to the first street curb section. The Quick Stop building model has doors that open and close (movements), and interior panel that can be used when you set the windows textures to clear or glass. Also included is an interior texture template if you wish to use the inside of the building.

See below for more details.

Full Description: The laundromat building model is mainly a facade building model. However the main laundromat door opens and there are texture templates for the interior of the building. The movie theater building has doors that open (movements set) and well detailed textures. Perfect for any urban or old town street scene. The Discount City building model has doors that open and closed. The window glass textures can be changed to transparent and there is a basic interior included. The newspaper dispenser is perfect for any street or business scene or render. The door opens and the top newspaper is removable. A texture template for the newspaper is also included in the textures folder. NOTE: If you have any of the individual building and props already installed you can overwrite the existing files if you want.
