Tire Swing Add-on Model for Kids Tree Fort Model

Product URL <https://poserworld.com/tire-swing-add-on-model-for-kids-tree-fort-model>

Short Description: The 3D tree swing add-on for the kid's tree fort model for Poser and DAZ Studio has a "swing" morph to swing the tire swing. Make sure the tire swing is parented to the tree fort model when adding it to a scene so the swing will move with the tree and so that the swing morph will work properly.
