Modular Rural Road Section Model

Product URL <https://poserworld.com/modular-rural-road-section-model>

Short Description: The 3D rural road model is modular and can be used side-by-side or across from a section. The barbed wire fence can be moved or removed as needed. The road, grass and field textures are extremely high detailed and are 4096 x 4096. If you need to you can reduce the textures down to 2048 x 2048. There is also an extra field section to expand the field area as needed. The BUMP map textures are a separate download due to the size of the textures. Even with the large textures the road sections are easy on Poser and DAZ Studio resources.
