Portable Sign With Customizable Messages Model - Poser and DAZ Studio Format

Product URL <https://poserworld.com/portable-sign-with-customizable-messages-model-pose-and-daz-studio-format>

Short Description: The 3D portable sign with customizable messages model for Poser and DAZ Studio is set up so you can put any message you want on either side (or both sides) of the sign. The letter panel textures includes A-Z alphabet, 0-9 numbers, a question mark, exclamation point, period and dash textures. Be sure to read the read me file for easier set up of your message on the sign (we've included it below as well). Each side of the sign model (Front and Back) has a blank letter panel already set up to be added to the correct row as needed. F Row 1 F Row 2 F Row 3 F Row 4 R Row 1 R Row 2 R Row 3 R Row 4 Add the chosen row panel to the sign, parent the panel to the sign and use the x-trans dial to move it on the row where you want it to show, then add a letter/number/punctuation texture to the panel and repeat until the words you want are on the line. Repeat on each row /line for your message. You can also duplicate panels with textures and move them to where you want them to appear on each row if you wish. All of the letters, numbers and punctuation textures are located under: \Runtime\Textures\PW Texture files\Portable Sign\ The colors of the sign can also be easily changed as needed.
