Modular Grass / Yard Square Model

Product URL <https://poserworld.com/modular-grass-yard-square-model>

Short Description: The 3D grass model for Poser and DAZ Studio is modular and seamless. The squares can be overlapped as needed to fit a scene. This model and texture took one hour to make. If using more than one square (as in a large area) we suggest that you overlap each one slightly and parent them to one square for easier movement and adjustment.
