Roadside Produce Stand Scene

Product URL <https://poserworld.com/roadside-produce-stand-scene>

Short Description: The 3D roadside produce stand scene for Poser and DAZ Studio is ready to go. It works well with our modular rural road section model and our individual fresh fruits and vegetable model sets (produce models). This scene is a 146 megabyte download. If you prefer you can download just the standalone produce stand and add items from our downloads to use with it. This Poser 3D scene took 35 hours to model and texture.
