Catacombs Set object for Vue

Product URL <https://poserworld.com/catacomb-set-object-for-vue>

Short Description: Catacombs Set for Vue (.vob) offers a unique and intriguing to render into the past, where history intertwines with mystery. It's a chance to capture the vision of hidden depths of cities and render the stories of those long gone. Plus, there's something undeniably fascinating about rendering figures of the living among the final resting places of millions. This set gives the opportunity to render a scene that presents a sobering reminder of our own mortality, wrapped up in a historical and sometimes spooky adventure. Just remember to bring a flashlight and a sense of humor – you never know what you might encounter down there!

This is a full set that includes tons of separate parts, which can be hidden or shown for more customization.

Don't want the torches on the wall? How about the spider webs or skulls or hangman nooses? Or maybe you don't need the columns in the middle of the room. They're separate parts, so go ahead and hide them.

A set of stairs leads down to the bottomless void...

Includes hidable ceiling and roofs for easy scene setup. Loads as the full scene, however individual objects can be separated or repositioned in Vue. These include:

Ground

Barrel (16), Base (7), Basin, Bed, Big Base, Boots, Candle (5), Casket,, Casket Cover, Ceiling, ChainHammer, Chair (3),
