Predator UAV Drone Model Poser Format

Product URL <https://poserworld.com/3d-predator-uav-drone-model>

Short Description: The 3D predator drone (UAV) aircraft model in Poser 3D model format has multiple movements. The targeting sensor rotates side-to-side and up-and-down. The landing gear has movements and can be hidden for flying scenes, the rear rudders have turn movements and the propeller spins. Each of the four missiles can be moved independently.
